

A photograph of a young couple in a modern living room. The woman, with long dark hair and wearing a yellow sweater, is leaning over the man's shoulder. The man, with short dark hair and a beard, is wearing a light blue button-down shirt and is holding a black smartphone. They are both smiling and looking at the phone. In the background, a white mini-split air conditioner is mounted on the wall. To the left, a hanging plant in a white pot is visible. To the right, a round black clock with white numbers is on the wall. In the foreground, a dining table is set with a checkered tablecloth, plates of food including eggs and tomatoes, and glasses of orange juice. A grey sofa with a yellow cushion is on the left.

MINI SPLIT HOMEOWNER GUIDE 2023

BREEZE33 ZONING

With single zone and multi zone unit options, Breeze33 has the right system to keep you comfortable in your home.

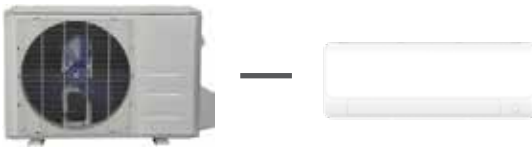

BREEZE33 MINI SPLIT SYSTEMS

Breeze33 offers both single and multi zone outdoor units to provide ideal temperature comfort in your home or light commercial settings. With an array of indoor units available such as wall mounts, ceiling cassettes, or concealed ducted units, Breeze33 provides affordable solutions for a variety of applications.

Whether you have a need for heating and/or cooling in one room of your home or office, or a need to control temperatures in multiple spaces, our systems provide the right solution for you.

SINGLE ZONE

When controlling temperature in only one room or area is needed, this application is considered single zone. Breeze33 has many different options for nearly any single zone application.

MULTI ZONE

If your needs are to control conditions in more than one space, this is referred to as a multi zone application. Breeze33 outdoor systems can operate up to 5 indoor zones and offers various indoor options for your needs.

UNIT STYLES

BREEZE33 COMFORT SERIES

OUTDOOR UNIT

These units are single zone heat pump units up to 20 SEER. Compatible with Comfort Series wall mount units only.

INDOOR UNIT

These units are compatible with Comfort Series outdoor units only.

BREEZE33 PREMIER SERIES

SINGLE ZONE OUTDOOR UNIT

Heats and cools down to -22°F with HyperPro Heating and Cooling. Units available up to 28 SEER.

MULTI ZONE OUTDOOR UNIT

Available as heat pump or HyperPro, this model allows operation of 2-5 zones from one outdoor unit.

CEILING CASSETTE

This unit sits recessed in a ceiling and provides 4-way or 1-way air distribution.

WALL MOUNT

Features LED temperature display on the front panel. Compatible with all Premier Series outdoor units.

FLOOR CONSOLE

This unit sits close to the floor and has two options for distributing air at the top or bottom. Available in 12K only.

INDOOR DUCTED

This unit has low to medium static pressure and is designed to be used for short duct runs in homes or offices.

MINI SPLIT AIR HANDLER

For single zone HyperPro or heat pump/HyperPro multi zone systems. Use with most 24V HVAC thermostats.

FLOOR/CEILING MOUNT

This unit can be mounted towards the floor, or horizontally on a ceiling. Available in 18K-48K.

CHOOSING THE RIGHT SERIES

COMFORT SERIES

Breeze33 Comfort Series systems are single zone heat pumps. This series is designed for a cooling only application or applications that have a low need for heat. These systems are only compatible with Comfort Series wall mounted units.

Single zone units are designed for cooling only or low heat applications.

PREMIER SERIES

Breeze33 Premier Series systems include Breeze33 Single Zone HyperPro outdoor units and Breeze33 Multi Zone systems, both in HyperPro and Heat Pump. HyperPro units are able to provide heating and cooling down to -22°F outdoor temperatures. These systems are compatible with Premier Series indoor equipment.

HyperPro systems provide heating and cooling down to -22°F outdoor temperatures.

SYSTEM FEATURES

- 

Single Zone System
System can be used with one indoor unit and a corresponding outdoor unit.
- 

Multi Zone System
System can be used with multiple indoor units and one outdoor unit.
- 

HyperPro Heat
Capable of heating down to -22°F with up to 80% capacity at -13°F.
- 

Premier Series
The unit is compatible with other Premier Series equipment.
- 

Comfort Series
The unit is compatible with other Comfort Series equipment.
- 

HyperPro Cooling
Capable of cooling down to -22°F. No additional accessories are needed.
- 

Follow Me Mode
This mode allows the temperature to be sensed at remote, rather than at indoor.
- 

Light Commercial
The unit is designed to be used in either a residential or light commercial application.
- 

Swing Mode
Swing Mode allows the indoor fan to move up and down to help circulate air and increase comfort.
- 

Wifi Capable
The system can be connected to the home's wifi.
- 

Wireless Remote
The unit includes a wireless handheld remote controller.
- 

Enhanced Dry Mode
Unit includes humidity sensor (G2 Premier wall mounts only).

TIP: This brochure is the same size as many of Breeze33's indoor wall mounts when unfolded. Use it as a placement guide for your new unit!

ACCESSORIES

Control the temperature of your home from almost anywhere! Breeze33 offers multiple thermostats & controllers to fit your needs.

HANDHELD REMOTE

The handheld remote is used to control indoor equipment. It can also be used in Follow Me mode to sense temperature from the handheld remote.

BZ33-WCON2

This wired controller can be used with Indoor Ducted, Ceiling Cassettes and Floor/Ceiling units. It has the same features as BZ33-WCON1, plus adds programmable scheduling.

BZ33-WCON1

Wired controller that can be mounted to a wall and used to control indoor equipment rather than the handheld remote. Compatible with all indoor units except Mini Split Air Handler.

CIELO BREEZ WIFI THERMOSTAT

Cielo Breez allows you to control your system from your phone. This thermostat is compatible with most Breeze33 indoor units.
