

### Installation Instructions

Properly inspect the wall or supporting structure that it is secure and will be able to support the wall bracket and unit.

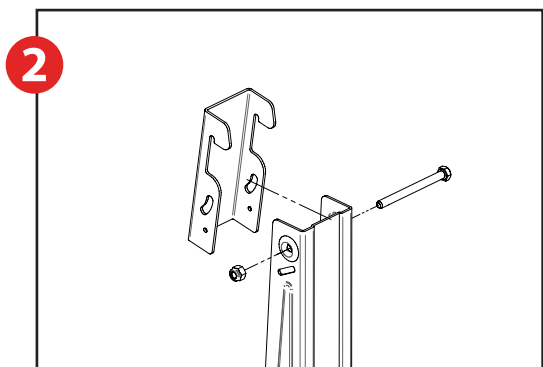

**Note:** Until installation, product should be stored in its original packaging and kept away from any weathered conditions.

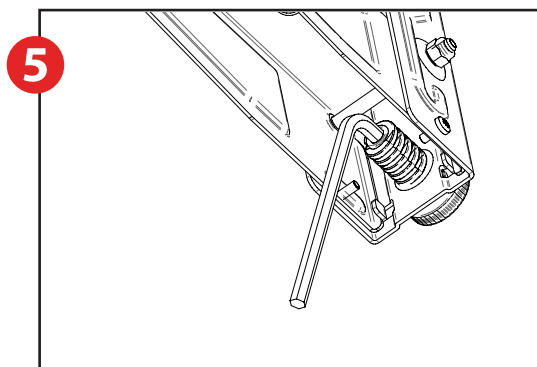

Level and fix the supplied crossbar to the wall. Use plugs at your discretion.

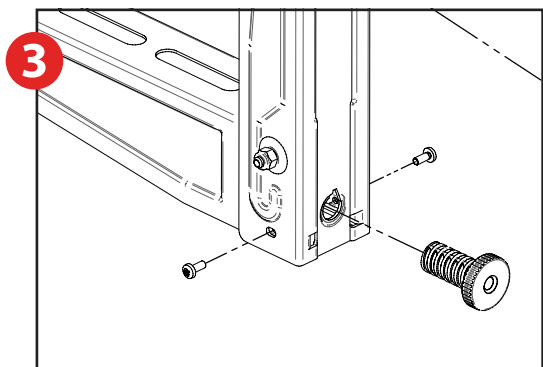

Place the washers on the horizontal arms.

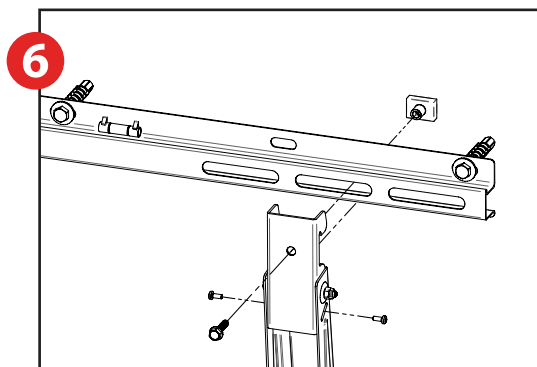

Using the appropriate nuts and bolts, secure the hooks to the upper arms.

Fasten dampers at the corner with flat side facing the back.

Adjust the distance of the arms to the wall using the nylon screws.

Secure to the crossbar with proper nuts and bolts.
