

HEAT PUMPS

15 SEER , 8.5 HSPF
Single Stage

HIGH QUALITY, CONSISTENT COMFORT
AND EFFICIENCY. PRICED RIGHT.

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider a Breeze33® system, quality is a given. You're getting peace of mind with great features and a smart design—and best of all, you get it priced right.

EFFICIENCY RATINGS

Consider the SEER and HSPF ratings that measure system performance. Higher numbers mean greater efficiency and lower energy bills for you.

SUPERIOR COIL PROTECTION

For durability in harsh environments, Omniguard® Total Corrosion Protection Technology is featured on all Breeze33 heat pump units, helping to protect against corrosive elements and extend the life of your heat pump for years to come.

IMMEDIATE SAVINGS

With a high-efficiency system, you may qualify for local utility and energy incentives as well as rebates†. Your Breeze33 professional can provide you with the latest information so you can take full advantage of available money-saving opportunities.

IS IT TIME TO REPLACE YOUR UNIT?

It can be hard to decide whether to repair or replace. Here are a few things to keep in mind when you're deciding:

- **Age of the unit** – Consider a new unit if your heat pump is 10-12 years old.
- **Updates** – New technology makes units more efficient and easier to control. Plus, older units use R-22 refrigerant that's scarce, expensive to recharge and harmful to the environment.
- **Repair costs** – Once repair costs exceed 50% of the cost of a new unit, a new purchase might be in order.

WHATEVER YOUR NEEDS, A BREEZE33® HEAT PUMP
IS HIGH QUALITY, PRICED RIGHT.

4HP15L

SAVE MORE MONTH AFTER MONTH.

The 4HP15L delivers significant energy savings and efficiencies of up to 15 SEER and 8.5 HSPF when paired with a matched Breeze33 variable-speed or constant torque furnace or air handler. Your Breeze33 dealer can recommend the right pairing for your home.

MAKE THE DECISION A BREEZE.

When you think about everything Breeze33 delivers, your decision is easy. With Breeze33, all your heating and cooling questions are answered. The performance and reliability you want are right here, and ready to go to work.

Breeze33. High quality, priced right.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your contractor for details or visit www.energystar.gov.
